The 9mm, whose technical name is 9x19mm, is also called the 9mm Luger or the 9mm Parabellum. It was originally adopted by the German Army in 1908 as the cartridge for the famous Luger pistol. Following the first World War, it was quickly adopted by countries and law enforcement agencies around the globe.

overnight or several days, should be avoided.

### **Hodgdon Reloading | Home**

There simply isn't much load data for the super-heavy 9mm bullets. Most manuals stop at 147 grains, though Hodgdon and Vihtavuori have data for 150 grain bullets. The current Lyman manual (49th Edition) does not have load data for anything heavier than 147 grains, but older manuals do. The Lyman 44th Edition has data for Bullseye, Red Dot, Unique and Herco for 158 grain cast lead bullets ...
