The connection of economic theory and behavior is one of the central topics of this book - and also a central issue in economic thinking of Horst Todt to whom this book is dedicated. The contributions deal with topics of normative and descriptive decision-making: They investigate, for instance, the emergence of decisions or the role of

Behavioral economics applies models of systematic imperfections in human rationality, to the study and engineering of organizations, markets and policy. These imperfections include limits on rationality, willpower and self-interest (Rabin, 1998; Mullainathan and Thaler, 2000), and any other behavior resulting
