Ranges Troubleshooting Guide | Amana

If nothing on your range is working, make sure the power cord is connected to a grounded operational outlet. Then check your circuit breaker and fuses to make sure the power supply is operating correctly. If it's a gas range, make sure the gas valve is on. Refer to the illustration in the previous section to check.

If the valve does not open, the oven will not heat. To determine if the igniter is defective, observe the igniter when the oven is on. If the igniter glows for more than 90 seconds without igniting the gas flame, this indicates that the igniter is too weak to open the valve. If the igniter is weak, replace it.
