Chapter 15 Ionic Bonds Compounds Answer Key

Key Points. Ionic bonds are formed through the exchange of valence electrons between atoms, typically a metal and a nonmetal. The loss or gain of valence electrons allows ions to obey the octet rule and become more stable. Ionic compounds are typically neutral. Therefore, ions combine in ways that neutralize their charges.

Ionic Bonds | Introduction to Chemistry

In general molecular compounds form when nonmetals combine together. I then show the class the answers using the ionic
