Bleeding Edge To Leading Edge

Some "techies" believe there is a progression from bleeding edge to cutting edge to leading edge. At the cutting edge, you still could get hurt, but the chances are greatly diminished. Like the bleeding edge, the cutting edge would be inappropriate for the Baldrige Criteria, which should guide all organizations to performance excellence. By the time you get to leading edge, you are ahead of the pack, taking some risk and dealing with a degree of uncertainty, but probably not in an ...

Bleeding Edge or Leading Edge? | NIST

Leading edge, not bleeding edge Often, executing a flank attack involves developing new technology. Whether you're considering launching a new business or looking to develop a new product in an established company, you may have a vision of a new technology will that expose a vulnerable flank in an entire industry or against key competitors.

Leading Edge or Bleeding Edge: The Make or Break Difference

Bleeding edge technology is a category of technologies so new that they could have a high risk of being unreliable and lead adopters to incur greater expense in order to make use of them. The term bleeding edge was formed as an allusion to the similar terms "leading edge" and "cutting edge".

Bleeding edge technology - Wikipedia

Bleeding edge also refers to this fact of being in the foremost, but the difference between bleeding edge and leading edge, is that bleeding edge is risky. Leading edge is not risky. Bleeding edge is. For example: Bleeding edge technology refers to technology that is so new that it could have a high risk of being unreliable and may incur greater expense in order to use it. PC Encyclopedia defines bleeding edge: A pun on "leading edge."
