### Amazon.com: Counting & Number Bonds: Math Games for Early ...

So, we get the sum as  $10 + 10 + 10 = 30$ . Through number bonds, we can also solve the problems of subtraction. Example:  $10 - \underline{\quad} = 8$ . Here, we know that 10 is the whole number and 8 is one of the numbers from the pair of number bonds. The other number that combines with 8 to give 10 is 2. So,  $10 - 2 = 8$ .

### What is Number Bonds? - Definition, Facts and Examples

Number bonds let students split numbers in useful ways. They show how numbers join together, and how they break down into component parts. When used in Year 1, number bonds forge the number sense needed for early primary students to move to addition and subtraction. As students progress, number bonds become an essential mental problem-solving ...

### Making Sense of Number Bonds | How to Teach, Examples, and ...

Count how many were circled and write it in the first small box on the right. Next, count the number of items not circled and write it in the second small box. Finally, count all of the pictures and write it in the large box at the top. This will complete the number bond and give you an addition fact such as the one shown:  $3 + 7 = 10$ .
