Felt and Torch on Roofing: A Practical Guide: Richardson ...

What is Torch-on Roofing Felt Torch-on roofing, or torch-down roofing as it is also known, is a flat roof covering solution that involves three layers of modified bitumen (felt) melt-welded onto the roof surface and each other with the use of a blowtorch to create an impenetrable, waterproof seal.

Why You Should Consider Torch-On Felt | Roofinglines

Tuesday, October 30 2018 Torch down roofing (sometimes referred to as “torch on” roofing) is so named because it requires an open-flame propane torch. In this installation method, sheets of modified bitumen are rolled out onto the roof, and a roofing professional uses a hand-held propane torch to heat the material and adhere it to the surface.

Guide to Torch Down Roofing Materials, Components, Pros ...

Roofing felt is required under roof tiles to stop the roof space from being exposed. Building regulations mean that an underlay underneath the slates or tiles is now a mandatory requirement. Roofing felt covers homes where a roof has not yet been secured, providing a temporary protective layer against weather such as rain and strong winds.
