Spending time discussing solutions for Legacy Systems often involves using a lingo where certain words may not mean the same thing to different people. One example is that the words, "migration", "modernization" and "transformation" are sometimes used interchangeably. Therefore it might be helpful to share one view of the distinction between the meanings of these words. Migration [...]

Using data from a survey conducted in 2003 and employing multilevel modeling, this paper examines the impact of migration and urbanization on drug abuse and casual sex in China. The results suggest that being a migrant predicts significantly higher odds of having casual sex but lower odds of drug abuse. Living in an urban place is a significant risk factor for both illicit drug use and casual sex.
