Oracle Web Cache is a content-aware server accelerator with reverse proxy capability for Oracle Web Tier 10g and 11g portfolio. Oracle Web Cache can improve Fusion Middleware 10g/11g web infrastructure and specifically Oracle Portal 10g Web Site performance, scalability, and availability. Oracle Web Cache offers the following benefits:

Web Tier Overview - Oracle Cloud

You can configure OracleAS Web Cache to cache content for Oracle HTTP Servers running Single Sign-On partner applications. By default, mod_osso protected pages are configured as non-cacheable with a Surrogate-Control: no-store response header. To override mod_osso default behavior, set OssoSendCacheHeaders to off in the httpd.conf file.
