## **The Social Neuroscience of Human-Animal Interaction ...**

Social neuroscience is an interdisciplinary field devoted to understanding the relationship between social experiences and biological systems. Humans are fundamentally a social species, rather than individualists. As such, Homo sapiens create emergent organizations beyond the individual—structures that range from dyads, families, and groups to cities, civilizations, and cultures. In this regard, studies indicate that various social influences including life events, poverty, unemployment ...

The Social Neuroscience of Human Attachment. The principal line of investigation in Dr Pascal Vrticka's research is devoted to examining the psychological, behavioural, biological, physiological, and neural basis of human attachment. In doing so, he is referring to attachment by means of inter-individual differences in ("organized") secure versus insecure, anxious and avoidant attachment orientations / classifications.
