8th Grade CMP - Mr. Doyle - Google Sites

Abstract: Scientific thinking is grounded in the evolved human ability to freely create and manipulate mental models in the imagination. This modeling ability enabled early humans to navigate the natural world and cope with challenges to survival. Then it drove the design and use of tools to shape and control the environment. Spoken language facilitated the sharing of mental models in ...

graphs • Describe data patterns using words and symbols • Write equations to express patterns appearing in tables ...

Thinking With Mathematical Models

We can use words, drawings or sketches, physical models, computer programs, or mathematical formulas. In other words, the modeling activity can be done in several languages, often simultaneously. ... to ways of thinking about mathematical modeling. Having a clear picture of why the model is wanted or needed is of prime

What is Mathematical Modeling?

A key idea of Thinking with Mathematical Models is to use mathematics to approximate real-world data. Mathematics provides precisely defined objects and operations that can be used to represent real-world data patterns that may not be as well behaved. Effective use of mathematical modeling requires awareness of the overall modeling process and
